

/login/

The screenshot displays the Zequence CONTROL Portal Page Design interface for the `/login/` page. The interface is divided into several sections:

- Header:** Shows the Zequence logo, a "CHANGE PAGE" dropdown menu, and user information (ipenaa@zequence.com).
- Left Sidebar:** Contains navigation options like "GATE admin portal (dev)", "Dashboard", and "APPLICATIONS" (Portals, Pages, Templates, Profiles, Transactions, Reports, Users, Hotspots, AAA services, Files, User log).
- Page Design Panel:** Features a "Toggle sponsored template" button and a "Generic Variables" section with fields for Background, Background color, and Banner UUID. Below it is a "System variables" section with fields for Welcome URL and Download App URL.
- Preview Area:** Shows a real-time preview of the login page. The page has a background image of a city street and a white login form titled "WELCOME TO OUR HOTSPOT". The form includes a "Login for Internet access!" subtitle, a red error message "User was disconnected after the login", and fields for "Username" and "Password". A "Login" button and "Powered by zequence" logo are also visible.
- Bottom Bar:** Contains action buttons: "Save", "Delete", "Close", "Save and close", and "Save and add another".

Overview

The Page Design interface in the Zequence CONTROL Portal allows administrators to customize the visual appearance and functionality of portal pages. This specific view shows the configuration page for a login page (`/login/`) where administrators can modify design elements, system variables, and page behavior through an intuitive interface with real-time preview capabilities.

Key Features

- **Real-time Preview:** Live preview of page changes displayed on the right side of the interface
- **Variable Management:** Configure both generic and system variables that control page behavior
- **Visual Customization:** Modify background images, colors, and other visual elements
- **Responsive Design:** Preview shows how the page appears to end users
- **Template Integration:** Support for sponsored templates and custom branding

UI Elements

Left Panel - Configuration Area

- **Generic Variables Section:**
 - Background image selector with dropdown menu and upload button
 - Background color picker with color selection field
 - Banner UUID field for custom banner configuration
- **System Variables Section:**
 - Welcome URL configuration field with expansion button for additional options
 - Download App URL specification field with expansion button for detailed configuration

Right Panel - Live Preview

- **Page Preview:** Real-time display of the configured login page
- **Hotspot Interface:** Shows "WELCOME TO OUR HOTSPOT" header with "Login for Internet access!" subtitle
- **User Notification:** Red error message stating "User was disconnected after the login"
- **Login Form:** Username and password fields with blue "Login" button
- **Registration Option:** "Use your credentials if you're registered" text above login fields
- **Background:** Urban street scene with cars and European architecture featuring historic buildings and pedestrians
- **Branding:** "Powered by Zequenze" footer attribution
- **Template Toggle:** Blue "Toggle sponsored template" button prominently displayed in the top-left corner of the preview
- **Preview Controls:** Three icon buttons positioned in the top-right corner of the preview area:
 - Comment/message icon button
 - Display/monitor icon button
 - Bookmark/save icon button

Navigation Tabs

- **Settings:** Available for general page configuration
- **Page Design:** Current active tab highlighted in blue for page configuration
- **Transactions:** Transaction-related settings

User Interactions

1. **Customize Background:** Click the background dropdown to select from available images or use the upload button to add custom backgrounds
2. **Color Selection:** Use the color picker interface to modify background colors and theme elements
3. **URL Configuration:** Enter custom URLs for welcome pages and app downloads in the system variables section, with expansion buttons available for additional options
4. **Real-time Preview:** Changes made in the left panel immediately reflect in the right preview panel
5. **Template Toggle:** Use the "Toggle sponsored template" button visible in the top-left corner of the preview area to switch between template modes
6. **Preview Controls:** Use the three icon buttons in the top-right corner of the preview area to access comments, display options, or bookmarking features

Navigation

- **Breadcrumb Path:** Home → Portal → Pages → /login/
- **Tab Navigation:** Switch between different configuration aspects using the horizontal tab menu
- **Portal Structure:** Access through GATE admin portal → Portals → Pages → Templates/Profiles
- **Organization Level:** Configure at the Zequenze organization level

Data Displayed

- **Page Information:** Shows page ID (1) and current view mode
- **Profile:** Displays "Basic" profile configuration
- **URL Structure:** Shows the page path (`/login/`)
- **Variable Values:** Current settings for background, colors, and system URLs
- **Preview State:** Live representation of how the page appears to end users including error messages and user notifications

Actions Available

Primary Actions (Bottom Bar)

- **Save:** Apply changes without closing the editor (blue button)
- **Delete:** Remove the current page configuration (red button)
- **Close:** Exit the editor without saving changes (gray X button)
- **Save and close:** Apply changes and return to the previous view (blue button)
- **Save and add another:** Save current changes and create a new page (blue button)

Secondary Actions (Top Bar)

- **Export:** Download page configuration
- **History:** View change history and version control (with notification badge showing "2")
- **Refresh:** Reload the current configuration

Notes/Tips

- **Background Images:** Ensure uploaded images are web-optimized for faster loading times. Use the upload button next to the background selector for custom images
- **Color Customization:** Use the color picker interface for selecting theme colors and visual elements
- **URL Configuration:** Use the expansion buttons next to URL fields to access additional configuration options and detailed settings
- **URL Validation:** System validates URLs entered in the Welcome URL and Download App URL fields
- **Auto-save:** The system may automatically save changes, but manual saving is recommended
- **Preview Accuracy:** The preview panel provides an accurate representation of the end-user experience including error states and notifications
- **Template Compatibility:** Some customizations may be limited when using sponsored templates
- **Mobile Responsiveness:** Consider how design changes will appear on different device sizes
- **Error Messages:** The preview shows real-time status messages that users will see, including disconnection notifications
- **Template Testing:** Use the toggle sponsored template feature in the top-left corner to preview how the page appears with and without sponsored content
- **Preview Controls:** Utilize the preview control icon buttons in the top-right corner for accessing comments, display options, and bookmarking functionality
